

INSTRUCTIONS

Kite, Sled 3-D (XL)

1. On the rubber side of the die, place a strip of masking tape along the edge where the cutting rule stops (Figure A). The tape will act as a guide.
2. Fold a 12" x 18" sheet of construction paper in half and place the fold side up against the masking tape guide (Figure B).

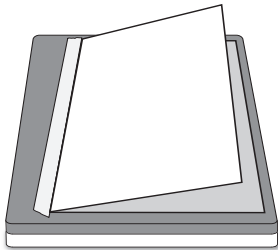

Figure B

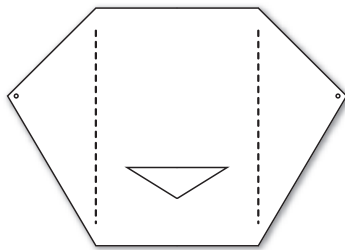

Figure C

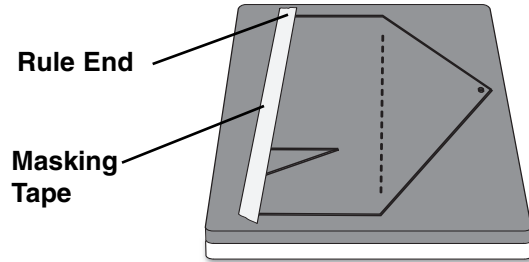

Figure A

3. Die-cut paper of your choice. Open up the Kite and decorate using crayons, felt tip pens or an art medium of your choice (Figure C). Students can decorate one or both sides of the Kite.

4. To assemble, fold along dotted lines. Tape a straw into the fold on each side (Figure D). Be sure to use strong tape to prevent your Kite from coming apart in the wind.
5. For the tails of the Kite, cut a plastic trash bag into 1" – 2" wide strips, which you will tape at the end of each straw (Figure D).

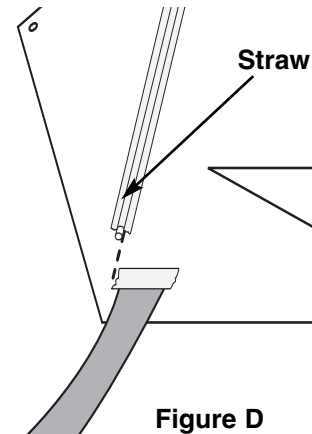

Figure D

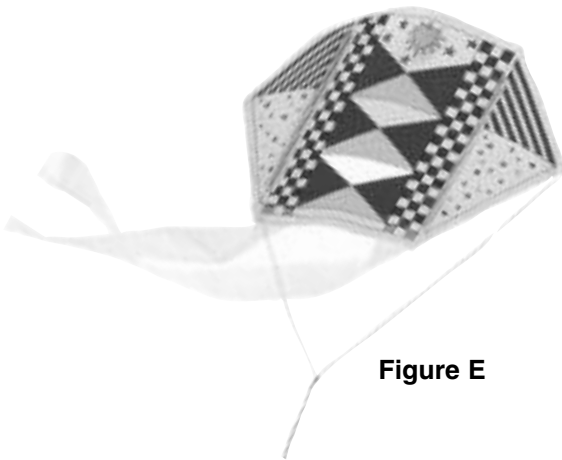

Figure E

6. Cut a piece of string about 3' long. Thread string through holes in the sides of the Kite (Figure E). Be sure to use a double knot to prevent the knots from coming loose.
7. Attach a roll of string to the middle of the 3' length of string (Figure E) and you're ready to go fly a Kite.
